VisualWorks Memory Management

Discussion of memory management strategies used by the VM

VisualWorks Bytecode Set

Describes the bytecode set used by the VM

VisualWorks Implementation Limits

Describes various limits (e.g. size) of VisualWorks objects and code

Taming Namespaces

Introduction to the use of name spaces in VisualWorks

Retiring the Polling UI

Changes entailed by replacing the polling UI

VisualWorks Help System

Describes the format and structure of Help System documents

Search Instructions

Adobe Acrobat can search multiple PDF files. Enter a search string in the search entry field, select the appropriate options, and click **Search**.

For faster full-text searches we have provided an index file. To use the index file:

1. Click **Use Advanced Search Options** at the bottom of the search panel.

2. In the **Look In:** field, select **Select Index...** and browse for **/doc/index.pdx** in the VisualWorks installation directory. For subsequent searches, select **Currently Selected Indexes**.

3. Enter a search string in the search entry field, select the appropriate options, and click **Search**
